Introducing Velari Wyatt Seating's Smartest Chair Yet

It's 2025, and every office deserves a chair with a bit of built-in brilliance. Designed from the ground up with ergonomics in mind, the Velari family seamlessly fits the need for healthy task, conference, and guest seating.

Its unique, ergonomic flattened footrest base encourages changes in seating position throughout the day, keeping your body moving and your mind focused. “Our goal is to deliver ergonomic solutions that just make sense”, said Nat Gallen, Vice President of Wyatt Seating. “People move throughout the day, and their chair should be able to support that”.

A premium European weight-responsive mechanism offers a smooth, automatic tilt tension without manual controls for effortless ergonomic comfort. Add to that an integrated seat slider right at your fingertips.

“The Velari provides our stakeholders with improved ergonomics at the same quality-to-price ratio they know and trust,” said Corey Smith, Business Development Manager of Wyatt Seating.

The Velari combines innovative engineering and personalized comfort with a cohesive design that brings the whole office together.

From base to headrest, every touchpoint works for you.

Multi-Surface Casters:

Mobility made easy no matter the surface.

Flattened Footrest

Base: Encourages healthy posture with a unique design that relieves leg pressure and helps keep you energized from start to finish.

Weight-Responsive

Mechanism: Find the perfect sit effortlessly with a premium European automatic tension control that adapts perfectly to each individual user.

Integrated Seat Slider: Smoothly slide into your ideal seat depth with an easy-to-reach control, giving you quick, precise adjustments right at your fingertips.
