

Roswellseating

Roswell

“Mars: 2050” that’s what it says on the ticket. There’s only about a thousand of them including alternates. How I got one, I’m not allowed to discuss just yet. Let’s just say that someone pretty high up at our national space program has been thoroughly enjoying a beautiful, custom-designed, ergonomic office chair, courtesy of yours truly.

ROSWELL task

FEATURES

Roswell

The celestial contours of Roswell's frame will instantly turn your workspace into your own command center. In addition to its stellar looks, it combines superior lumbar technology and customization with a value-position price point that makes this chair truly out of this world. Like most of our products, the Roswell comes standard with a breathable mesh back, 3D adjustable armrests, a multifunction mechanism, and a sturdy nylon base with nylon sport casters. And with a wide seat pan and slider, it can make even the most turbulent day seem like you're floating in zero gravity.
