

## Inspiration

An adult male lion weighs over 800 pounds and has the bite force to crush steel. If you are ever face-to-face with one you're supposed to yell and assert your dominance – not try to distract it with the card trick you picked up at the casino last night. Did I know all this before I jumped in the cage? No. But I dropped my lucky hat. What was I supposed to do?

\* other available options

### Adjustable Height Ratchet Back

Adjust lumbar by simply sliding support to desired position.

### Lumbar Support

Provides sturdy and comfortable support.

### Upholstered Back

Soft and durable material available in grey or black.

### 3D Adjustable Arms

While pressing up on the button on the outside of the arm, raise or lower the arm to set the arm height. Twist the arm right or left to adjust the arm angle. Slide the arm pad forward or backward to adjust the arm depth.

\*4D Adjustable arms

### Synchro Tilt Multi-function Mechanism

To activate, pull up the paddle which will raise and lower the seat pan on the cylinder. Recline to desired angle on the back while pulling the paddle away from the mechanism. To return to free movement push the paddle in towards the mechanism and lean back.

### Seat Slider

Pull up on the lever to activate. While holding the lever the seat will slide forward and back, locking when the lever is released. The front of the mechanism has a tension knob; turn right to tighten and left to loosen the tension of the back.

### Removable Seat Slip Cover

Easily remove and replace seat cover to customize chair to your style.

### Nylon Base

Sturdy nylon base weight and sport casters allow for easy mobility.
